

John Aagaard

OBJECTIVE

Experienced Software Engineer with a strong background in full-stack development, proficient in Javascript, React, and Node. Proven track record of designing and delivering high-quality software solutions. Seeking a challenging role where I can leverage my expertise to contribute to innovative projects, collaborate with cross-functional teams, and continue to enhance my skills in a dynamic and growth-focused environment. Eager to explore new technologies and bring a fresh perspective to drive success for the team and the organization.

EXPERIENCE

Prodly Inc, Salt Lake City, UT June 2021 - Jan 2024

Software Engineer - React & Node

- Streamlined development process and enhanced performance by constructing reusable components aligned with product requirements and UX design. Achieved a 20% increase in development speed and a 15% improvement in overall performance
- Implemented Restful API endpoints to facilitate seamless communication between the client, external APIs, and our internal Java API. This integration enhanced system architecture and interoperability, resulting in improved efficiency and streamlined operations.
- Orchestrated multiple OAuth workflows to enable effortless authentication into customers' Salesforce instances and seamless integration with their preferred version control systems. Additionally, established a secure connection with our Java API, enhancing the user experience and simplifying onboarding for customers.

Awesemo, Salt Lake City, UT January 2022 - April 2022

React Native Contractor

- Engineered multiple pages based on designs and utilized API endpoints to deliver, utilize, and modify data and display it per the Client's specifications. Collaborated with design and API teams to meet client needs and ensure data delivery.
- Assisted in getting the mobile app into both Apple and Android app stores within 4 months to meet expectations. Partnered with the release management team to test and meet app store requirements.

Ambi Inc, Salt Lake City, UT Sept 2019 - May 2021
Software Engineer - React & Node

- Learned multiple roles working for this startup and helped established workflows from the Product Team to the Engineering Team to help streamline feature requests and prioritization of work
- Helped develop API services and utilized the services to deliver content to the front end and display it based on Product team designs
- Built multiple React components that were reusable throughout the application that improved the user experience and improved customer success
- Began building external tools for our internal admins utilizing GO and React to help alleviate customer complaints and improve sales team data
- Constructed multiple views for the mobile app to have feature parity with the web app to give users a seamless user experience

Ambi Inc, Salt Lake City, UT August 2019 - Sept 2019
Software Engineer Intern - React & Node

- Engaged in quality assurance testing for a new platform in higher education
- Tested components functionality ranging from user profile to primary navigation
- Coordinated with the development team to help resolve user experience issues

Spotlight Media Tours, Salt Lake City, UT March 2019 - May 2019
Software Engineer Intern

- Prototyping a new phone application connecting a camera via wifi to capture preview images and altering the names for faster filing for website upload
- Designed multiple mobile pages based on a high fidelity mockups using React Native
- Skills Used: React Native, JavaScript, CSS

SKILLS

React JavaScript HTML CSS Git Node.js SQL GO
